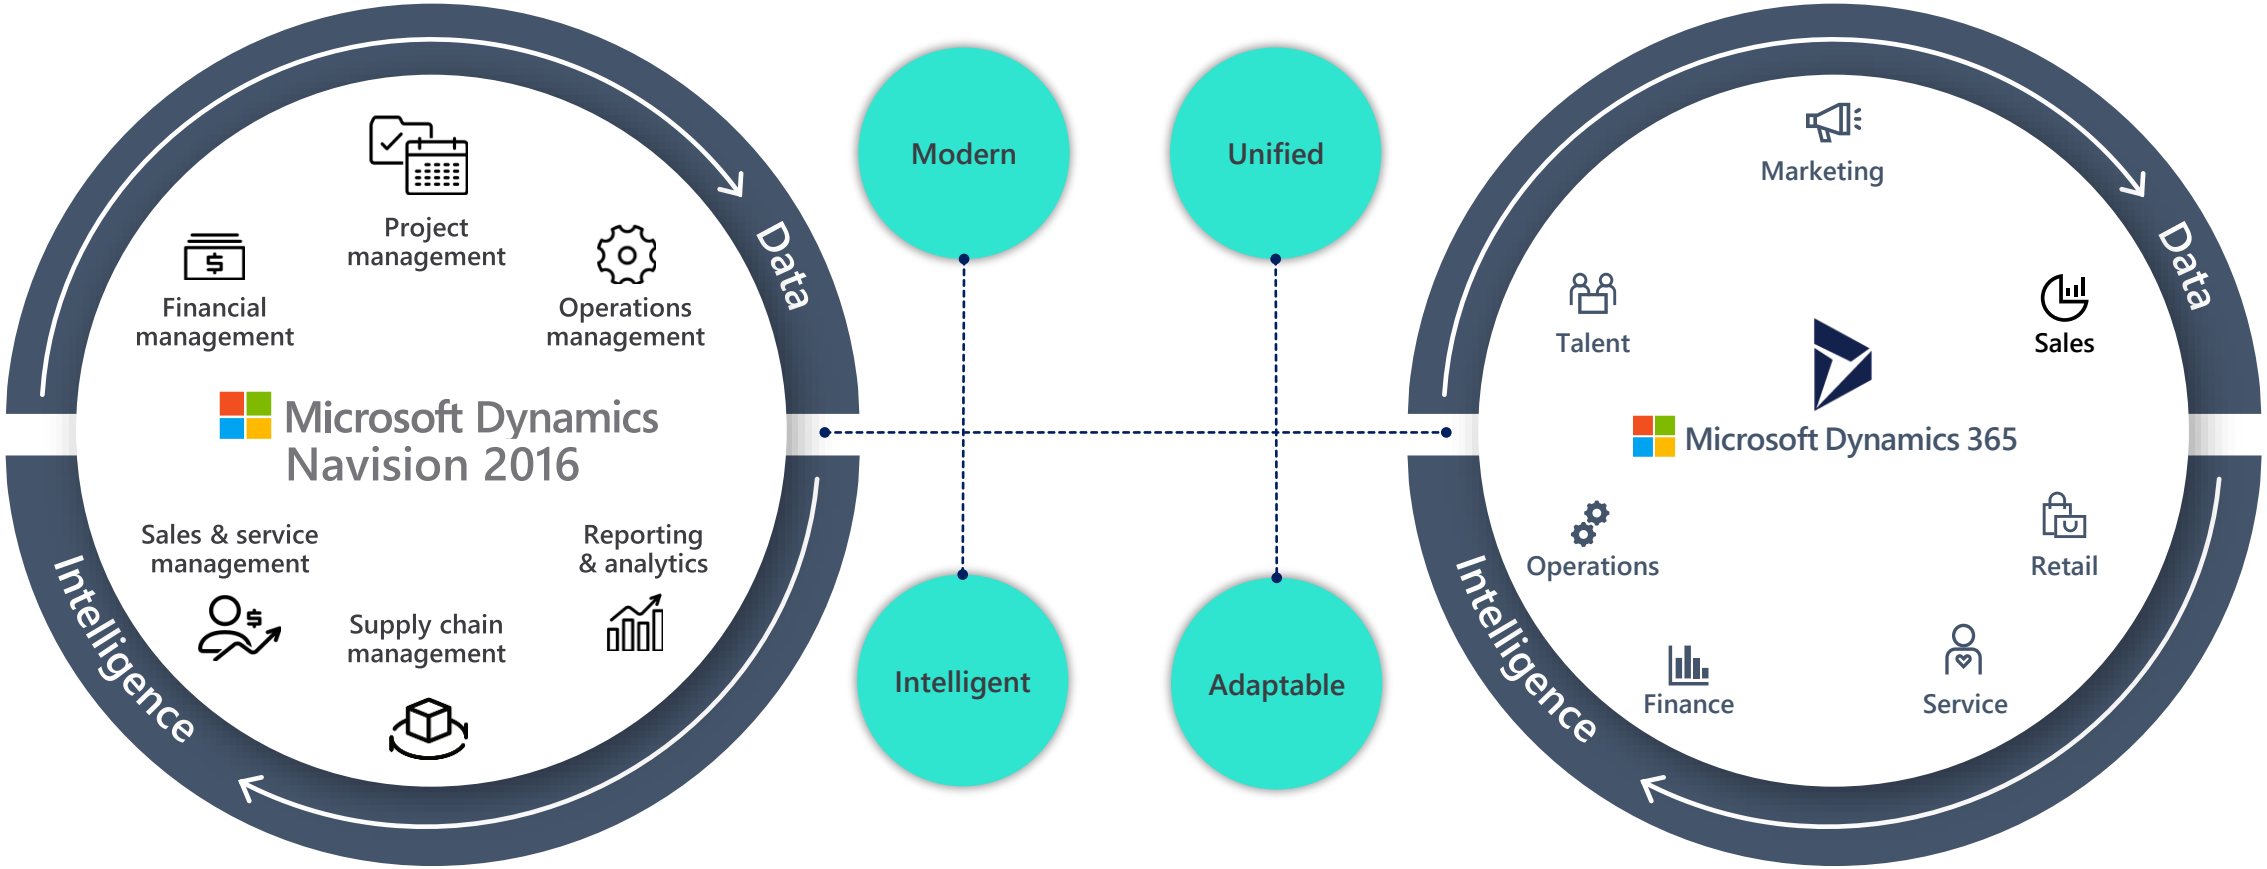
Microsoft Business Applications Ecosystem



Seamless Integration with these Applications

Power BI | Flow | PowerApps | Office 365

Compare Microsoft Dynamics Navision & Dynamics 365 Business Applications

Feature	Microsoft Dynamics Navision	Microsoft Dynamics 365
Date Established	1987	2016
Minimum Number of Users	1	20
Infrastructure	**Any** – Can be installed on physical server, hosted on private cloud or on Azure	**SaaS preferred** – A cloud solution hosted on a Microsoft Azure Platform, no installations necessary. Can be accessed through internet browser (Tablet, Mobile, Desktop)
Project management capabilities (Partner & Customer)	Navision is a tried and tested product because it's been there for a long time. Adaptability & ease of use makes users learn quickly. Comes easily with any industry's ecosystem. Simpler to implement & manage. Generally requires smaller implementation teams.	D365 is relatively a new product. Slightly difficult to implement and manage. Requires highly professional technical resources to manage the solution. Generally requires larger implementation teams.
Configurability & Customizations	**Extreme** – The open codebases allow developers to easily customize the solution. A lot of the customizations are already developed and a rich pool of talented developers already exists	**Medium** – The AppSource offers modules & extension plugins. Customizations can be made by adding or removing any module from the AppSource.
Upgrades/Updates	Requires Project based upgrade for both standard & custom modules	Automatic for standard implementation but project based upgrade for custom modules
Time Frame to Implementation	4 – 6 months	8 – 10 months
Company Size	Small to Mid	Mid to Enterprise
Industry	Distribution/Trade, Manufacturing, Professional Services. Supports approx. 90% of manufacturing functionalities. A great option for discrete, lean and process manufacturing lightly. Other core functions, such as WMS with mobile solutions, etc. are included.	Distribution, Manufacturing, Retail, Professional Services, Public Sector With the Premium package, additional capability in service management and powerful out-of-the-box manufacturing is available.
Multi – Company	YES	YES

Compare Microsoft Dynamics Navision & Dynamics 365 Business Applications

Feature	Microsoft Dynamics Navision	Microsoft Dynamics 365
Multi – Currency	YES	YES
Modules/Apps	• Financial Management • Supply Chain Management • Ware House Management – Available in Extended Pack • Manufacturing Management – Available in Extended Pack • Basic Project Management • Basic Human Resource Management • Basic Customer Relationship Management	• Financial Management • Supply Chain Management (Manufacturing, Warehouse, Production) • Advanced Project Service Management • Commerce (Retail) Management • Advanced Human Resource Management • Separate Customer Relationship Management apps
Licensing	Flexible – Perpetual & Subscription	Rigid – Subscription (module/app based)
License Types	• **Concurrent Client Access License (CAL)** – Unlimited number of individuals can be defined in the system, however the number of individuals accessing the solution at any given time may not exceed the total licensed number of Concurrent CALs. • **User Subscription Access Licenses (SAL) –** Only available in the Subscription Licensing model, grant individual users the right to access the application irrespective of the number of users simultaneously accessing the application.	• **User SL (Subscription License) –** Each user requires a separate User SL **"named user"** subscription. User SL's cannot be shared, but an individual with a User SL may access the service through multiple devices. • **Device SL (Subscription License) –** With Device SL any number of users can access a licensed device without the need for separate User SLs.
Cost	**License** – Licenses can be purchased either perpetually or as a subscription. **Implementation** – Moderate costing for standard implementation & additional customization.	**License** – Licenses can be purchased either perpetually or as a subscription. However, Subscription is preferred as infrastructure cost are included in the price which is considerable. **Implementation** – High cost for Standard implementation. Additional customization can be very expensive.
